

Dear All,  
I feel as though I could be on another planet. The strange vista is created by ongoing geothermal activity. Steam rises from pools, which can gradually disappear then suddenly erupt in a powerful jet of steam and water. There are many wild animals living in the park including free-ranging herds of bison and elk. There are grizzly bears as well as black bears (no relation!). I was very excited to hear that there is a programme to restore wolves to this National park. I think this is a wonderful idea although not everyone agrees. What do you think?

All my love

B.
